

# Paddling Together for Organizations<sup>©</sup>

Paddle design by Mulidzas-Curtis Wilson

A **strategic planning workshop** designed to help organizations create a path toward working more collaboratively and respectfully.

Traditionally we had many ways of treating one another which affirmed our belief that everyone is a sacred gift. This workshop experience from the **Village Workshop Series<sup>©</sup>** will help awaken and deepen our understanding of traditional ways and values of being together in a 'Village'. We will look at how we can make our place of work more like a 'Village'. We will explore our personal and organizational roles in supporting the revival of those values that worked so beautifully for thousands of years. Together, we will vision and commit to organizational goals with a focus on creating a shared path forward in working collaboratively and respectfully in a decolonized system.

## Learning Outcomes:

- Create a deeper understanding of the traditional values inherent to being part of a Village.
- Learn how we contribute to a healthier, more collaborative, respectful and ultimately productive workplace by embracing these values and incorporating them into our daily lives.

## Objectives of the Visioning Day:

- Networking and team building for a collaborative group;
- Create a strategic plan, including the creation of a new, shared vision, goals and clearly defined, agreed-upon values, and a proposed implementation plan.
